CLAIMS

1   1.   A method for generating a work-in-progress (WIP) tracking report reflecting a

2   progress of WIP through a semiconductor supply chain of vendors, the method comprising the

3   steps of:

4   receiving a first WIP update from a first vendor;

5   updating a data representation of the semiconductor supply chain to reflect the first WIP

6   update; and

7   generating a WIP tracking report from the data representation of the semiconductor

8   supply chain, wherein a volume of WIP is measured in expected good parts.
